Special tips and offers from Chartered Physiotherapists

Solutions saddles website:

They offer a hire service so you can try them before you buy. These treeless saddles (SMART) look just like a conventional one so you can get the look without the problems. We have found they are very useful here at the clinic for helping the horses get stronger and build up the spinal muscles, particularly behind the scapula.

Does your horse pull back?

The 'blocker' tie ring. I have seen these on professional yards and they swear by them! Visit www.toklat.com for more information about them.

Hire our school:

It does not freeze, book an assessment afterwards, meet your instructor here: £20 per hour

Dogs and Cats:

Cheryl Sears MRCVS, holistic vet comes to out clinic twice a week. She deals with skin, behavioural and joint problems using a common sense approach combined with acupuncture and homeopathy.

Our new website and logo!

A.S.A.P is proud to announce the launch of their **new and improved website and logo.**

The **website address has stayed the same** so you can still find it easily.

The website holds all the information you may need about us including all our recent courses, offers and photos. **Go to the website and check it out now.**

We have also given our logo a new makeover, we hope you like it!
